

Working at Heights Permit

There is now a Roof Access Procedures and accompanying Access Register in place to suit new building extensions and roof safety systems put in place with the Terminal Expansion Project (*Roof Access Permit refers*).

For other working at heights jobs being conducted on airport a safe work method statement (SWMS), Job Safety Analysis (JSA) or equivalent must be undertaken and be ratified by the NT Airports Project Manager or the WHS Advisor, prior to any work being started.

If you have any queries in this regard please contact the WHS Advisor on 8920 1969.
